OBJECTIVE

Motivated Computer Engineering graduate with a strong foundation in software development and modern web technologies. Seeking an opportunity to apply my technical skills, gain hands-on industry experience, and contribute to innovative projects while continuing to grow professionally.

EDUCATION

Bachelor of Science (B.S.) - Computer and Control systems Engineering *Sep 2021 - Jun 2026.*
Mansoura University.

INTERNSHIPS

Digital Egypt Pioneers Initiative (DEPI) *June 2025 – Dec 2025.*

Software Development Intern - React Frontend Developer

- Developed responsive user interfaces using React, HTML5, CSS, and JavaScript.
- Contributed to full-stack application development using the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- Gained hands-on experience with Git, GitHub, backend API development, and Agile software development workflows.
- Collaborated within a team environment to design and deliver a final graduation project, *Medicore*, applying modern frontend and full-stack development practices.
- Applied TypeScript knowledge and UX/UI design principles while working on real-world projects.

National Telecommunication Institute (NTI) *July 2025 – Oct 2025.*

MEAN Stack Developer Intern

- Completed an intensive 210-hour full-stack development program focused on building scalable web applications using the MEAN Stack (MongoDB, Express.js, Angular, and Node.js).
- Developed hands-on experience in designing RESTful APIs, database management, authentication systems, and deploying end-to-end web solutions.
- Collaborated on real-world projects while applying software engineering best practices and agile development methodologies.
- Completed an additional 30-hour professional development track covering client communication, project management, and freelance business strategies.

Gulf of Suez Petroleum Company (GUPCO) - Trainee *July 2024.*

- Gained foundational knowledge in Linux systems and networking within industrial environments.
- Observed real-world applications of IT infrastructure in petroleum operations.

PROJECTS

Rafiq - Graduation Project (Medical Web Application) *Sep 2025 –*

Present.

- Led the frontend team in the graduation project.
- Responsible for planning and coordinating frontend development tasks among team members, ensuring consistent UI structure and smooth integration across the application.
- Developed and implemented key frontend features, including reusable UI components, responsive layouts, and integration with backend APIs for dynamic data handling.
- Focused on usability, responsiveness, and delivering a seamless user experience.

Medicore - Smart Pharmacy App *Aug 2025 – Jan 2026.*

- Contributed as a full-stack team member in the development of the smart pharmacy web application built with React, Node.js, MongoDB, Mongoose, and Tailwind CSS.

- Responsible for implementing key features including product listing, categories management, and search functionality, along with parts of both frontend and backend development.
- Played a major role in selecting and designing the UI structure, focusing on usability, responsiveness, and smooth user experience across the application.

Verigo - Movie Browsing Web Application

july 2025.

- Developed a modern movie browsing application using React and Vite, enabling users to search, explore, and view detailed movie information.
- Implemented features such as favorites management using localStorage, smooth client-side navigation with React Router, and global state management using React Context API.
- Focused on building a fully responsive and user-friendly interface using Tailwind CSS to ensure optimal experience across all devices.

COURSES

Complete Node.js Bootcamp - Udemy

Dec 2025.

- Advanced backend development using Node.js, Express, MongoDB, and Mongoose. Built RESTful APIs with authentication, security, payments (Stripe), email services, and deployment. Gained practical experience in real-world backend architecture and full-stack workflows.

UI/UX Design - SprintUp

June 2025.

- Learned the fundamentals of user interface and user experience design, including wireframing, prototyping, and usability testing.
- Gained hands-on experience with tools like Figma and design-thinking processes to create user-centered solutions.

HCIA-AI V3.5 - Huawei ICT Academy

August 2024.

- Covered core concepts in Artificial Intelligence, including machine learning, deep learning, and AI frameworks.

HTML / CSS - Elzero Web School

August 2023.

- Acquired practical skills in HTML5 and CSS3 for responsive web development.
- Focused on semantic markup, layout techniques, and clean, maintainable code following industry standards.

Digital Marketing - Udacity

August 2021.

- Studied key aspects of digital marketing, including SEO, SEM, email marketing, and social media strategy.

SKILLS

• HTML/HTML5	• CSS/CSS3	• JavaScript	• React	• Next
• TypeScript	• Bootstrap	• Tailwind CSS	• Node.js	• Express
• SQL	• MongoDB	• Code Patterns	• UX/UI Design	• Git & GitHub
• Docker	• C++	• OOP	• C#	• Embedded C
• Data Structures	• Networking	• Unit Testing	• MS Office	• PowerPoint

LANGUAGES

- Arabic (Native Language)
- English (B2)
